Good Insulation

Save Cost and Increase Profit

New RBM Technology

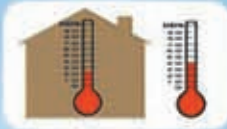

FIRE RESISTANCE

- The foam concrete is no reaction occur when expose to fire

WATER RESISTANT

- The foam concrete does not absorb water

GOOD INSULATION

- The foam concrete not a good heat conductor
- Inside the house remain cool

SOUND PROOF

- The wall can absorb the echo and reduce the noise

LIGHT WEIGHT

- The concrete has millions of air bubbles trap inside that make it very light.

CAN BE SAWN, NAILED & DRILLED

- The foam concrete is easy to sawn, nailing and drilled without damage the foam concrete's structures

ADDITIVE ITEM:

Description

1. Ready-to-used powder admixture with the advanced RBM Technology.
2. Specially designed to reduce the weight normal concrete and replaces blocks/bricks.

Features

- Simplify works
- Produce stable foam
- Better workability
- Reduce the concrete weight
- Smoother surface

No Stable

Stable Foam

Applications

- 0.1kg (foam additive)+10 to 40kg (Pure water) into foam generator
- Foam Mortar for RBM-1000 (foam concrete machine)
- Able to generate 2000-5000 times of foam from a part of RBM foam additive

Step 1

1 Packet of RBM Foam Additive 100g

Step 2

Diluted with water about 5 minutes

Step 3

Fill into RBM Foam Generator

Step 4

Discharge the foam to mix with mortar
